

New Ready-To-Use Peripheral Blood Karyotyping Media in Tubes

(Cat # IS1113)

ID Labs has just released Ready-To-Use Peripheral Blood Karyotyping Media in Tissue Culture tubes. The tubes contain 5 ml of complete media, containing PHA (cat# IS1113).

Advantages:

- ◆ Ready to Use - Just thaw and add your blood samples
- ◆ Incubation in tube allows excellent growth of cells
- ◆ Can also be used in the next step as a centrifuge tube, if needed
- ◆ Saves the cost of using a T-25 flask, and aliquoting contamination issues
- ◆ Saves time and money

Other Media Available:

- | | |
|--|--------------|
| ◆ AmcelGrow® Media (for amniotic cell culture) | cat # IS1001 |
| ◆ Karyotyping Media-BM (for Bone Marrow Cells) | cat # IS1012 |
| ◆ Karyotyping Media-PB with PHA (for Peripheral Blood Cells) | cat # IS1097 |
| ◆ Karyotyping Media-PB w/o PHA (for Peripheral Blood Cells) | cat # IS1003 |
| ◆ Karyotyping Media-HC (for Hematopoietic Cells) | cat # IS1013 |
